KEYSTONE PASTURE MIXTURES

Pastures, and pasture mixtures of grass seed and legumes, are demanding more attention this spring than at any time since the World War. There is a decided move among thinking farmers to replace some of the surplus grain producing acreage with pastures and meadows which will conserve and improve the fertility of the soil and decrease the expense of farm operations.

To provide ready mixed seed for a permanent pasture, suitable for various soil conditions, we have consulted Experiment Station authorities and have prepared such mixtures in accordance with their recommendations.

TRUE KEYSTONE QUALITY

Contrary to usual practice in preparation of pasture mixtures, we have used the highest quality Keystone seed only in the preparation of all three of the Keystone pasture mixtures listed and quoted herein. These mixtures are all free from noxious weeds, according to state seed law definitions.

TRUE SOIL BUILDERS

Legumes form an important part of each mixture and all three contain a liberal percentage of Korean Lespedeza which agricultural authorities agree should be present in every pasture.

COSTS VERY LOW

Prices of Keystone Pasture Mixtures are extremely low when the high quality is considered. The acre cost is also low as the recommended rate of seeding is 25 pounds per acre.

KEEP A SUPPLY ON HAND

We suggest that you order out a reasonable supply of the mixtures suitable for the soils in your locality and that you recommend these freely to your customers.

KEYSTONE PASTURE MIXTURES

(Formulae recommended by Mo. Agr. Experiment Station. To be sown at 25 lbs. per acre.)

Order by number	5 Sacks & Over	1 to 4 Sacks	Less
Number One Pasture Mixture..	\$7.50	\$7.75	\$8.50
For productive, well drained, upland or bottom soils.			
Number Two Pasture Mixture..	7.00	7.25	8.00
For flat, level, poorly drained, probably acid soils.			
Number Three Pasture Mixture	6.50	6.75	7.50
Thin, worn, gravelly or stony soils.
